DETAILED ACTION

Response to Amendment

Applicant's Amendment filed on August 24, 2007 is acknowledged.

Rejection is maintained as it was set forth in previous Office Action mailed on May 24, 2007.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-13 of Application No.10/532,137 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 7,153,622. Although the conflicting claims are not identical, they are not patentably distinct from each other because claimed subject matter claimed in Claims 1-4 of concerning Application No.10/532,137 significantly overlapping in scope

with claimed subject matter of US. Patent No. 7,153,622 (claims 1- 17) : chemical structures of PHA copolymers claimed in both documents are same with same area of use claimed PHA for toner composition. Note that US Patent No. 7,153,622 claimed the same PHA copolymers as disclosed in EP 1253475 (see rejection under 35 USC 102(a) in previous Office action mailed on Jan 22,2007).

2. Claims 1-13 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1- 3 of copending Application No. 10/532136. Although the conflicting claims are not identical, they are not patentably distinct from each other because claimed subject matter claimed in Claims 1-4 of concerning Application No.10/532,137 significantly overlapping in scope with claimed subject matter of claims 1-3 of the copending Application No. 10/532136 : specific PHA structure claimed in concerning Application "137" - see formula (1) could comprise same unit as claimed in formula (6) of copending Application "136".

This is a provisional obviousness-type double patenting rejection.

Response to Arguments

Applicant's arguments filed on August 24,2007 have been fully considered, but they are not persuasive.

3. Regarding Applicant's arguments related to ODP rejection over US Patent 7,153,622:

as it was explained previously chemical structure of PHA claimed by US Patent 7,153,622 substantially same or identical to chemical structures claimed by concerning

Art Unit: 1711

Application. Therefore, as substantially same chemical compound, PHA claimed by US Patent 7,153,622 will inherently have same properties and will be capable to perform same functions, including ability to regulate charge as a charge control agent as a part of toner composition. Note, that US Patent 7,153,622 does disclose this utility.

4. Same related to ODP rejection over Application No. 10/532136.

Therefore, Applicants arguments found not persuasive.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
